

European Statistical Meeting

Latest Trends in Health Technology Assessments

Tuesday 28th November 2017, London

This 1-day scientific meeting will provide an update on latest trends in HTA, including: the Real-World Evidence Navigator tool created by the IMI GetReal project; the EUnetHTA Joint Action 3 initiative and methodology being researched; introduction to value-based frameworks and estimands in HTA. Patient perspectives in HTA will be discussed including how to involve patients in HTA and latest methods in patient reported outcomes. HTA related methodological considerations will be highlighted including approaches to handle treatment switching in HTA. Industry HTA case studies will also be presented.

Speakers include well known representatives from academia, European regulatory bodies and industry. The day will end with a panel discussion.
