University of Reading

Maths Meets Medicine

Have you ever taken a medicine?

Did you know that without maths & statistics we cannot make new medicines?

Maths Meets Medicine provides KS4 students with the chance to see a real-world application of maths and statistics and learn about their crucial role in the development of new medicines.

- Aims to inspire students to study maths and statistics to a higher level and consider alternative careers paths
- Complements and extends statistical concepts covered in KS4 & KS5.
- Includes interactive, statistics-based workshops and a tour of the campus

Interactive workshops

What is PSI?

PSI is a non-profit organisation promoting best practice for statisticians working in healthcare and drug development. We are passionate about raising awareness of the industry and the benefits of studying statistics to a higher level.
