A Bayesian dose finding design for oncology clinical trials of combinational biological agents

Co-authors: Chunyan Cai, Yuan Ji;

Journal of the Royal Statistical Society: Series C (Applied Statistics), Volume 63, Issue 1, Pages 159–173, January 2014

Speaker: Michael J Sweeting, Department of Public Health and Primary Care, University of Cambridge

Escalation strategies for combination therapy Phase I trials

Co-author: Adrian P Mander;

Pharmaceutical Statistics, Volume 11, Issue 3, Pages 258–266, May/June 2012

Discussant: Tony Sabin, Amgen

For each of these published papers there will be a 20 - 25 min presentation by the author, after which the lines will be opened to the floor for questions and a 20 – 25 min discussion.

Articles will be available to view from March 25th to April 22nd from either the [PSI homepage](#) or from the [RSS homepage](#). Presentation slides will be available to view and download from the above websites from 27th March. Web access will be available via the above link on the day if preferred. Journal subscribers can access papers at any time. Podcasts will be available shortly after the TC to download from the above websites.

Open to PSI and non-PSI members and RSS and non-RSS members – no need to pre-register.

We encourage you to read these papers in advance so you get the most from this event.

Where multiple people are dialling in from the same site, we encourage you to book a meeting room and dial in together.

For further info/feedback, or if you would like to submit a question to the authors in advance of the meeting please contact journalclub@psiweb.org
